

# Bonding Poster

Each group will make three posters focusing on the rules for naming compounds as well as writing formulas from names. The posters should be on the following topics, and should include:

## Names and Formulas for **Ionic Compounds**

- definition of "ionic compound/bond"
- rules for naming
- steps to write formula from name

## Names and Formulas for **Covalent Compounds**

- definition of "covalent compound/bond"
- rules for naming
- steps to write formula from name

## Names and Formulas for **Hydrocarbons**

- definition of "hydrocarbon"
- definition of alkane, alkene, and alcohol
- rules for naming alkanes, alkenes, and alcohols
- steps to write formula from name

Remember...

**YOU** are the teacher when others read your poster.

Use these websites and follow the directions to use Google draw to learn how to make your 3 interactive posters:

[Google Drawings Interactive Posters - No Glue Sticks Necessary!](#)

[YouTube: Using Google Drawings to Make a Poster/Flyer/Collage \(5:36\)](#)

When you are done with each poster, share it with me on Google drive.

Tip: This poster should be INTERACTIVE. That means you should insert "clickable links" that take your target audience straight to a website of interest. Example: Click [here](#) for an interactive game on Ionic Bonding!

This project was fun!  
Look!  
I earned an A+

Why doesn't Mrs. Forest just let us sleep in class ???!!!

Tip: Use awesome pictures and colors for a better grade!
